

MySQL commands

The screenshot displays the MySQL Workbench interface. The left sidebar contains the 'MANAGEMENT' section with options like Server Status, Client Connections, Users and Privileges, Status and System Variables, Data Export, and Data Import/Restore. Below this is the 'INSTANCE' section with Startup / Shutdown, Server Logs, and Options File. The 'PERFORMANCE' section includes a Dashboard and a link to Performance Reports. The main window shows a SQL query in the 'Query 1' tab, which is a SELECT statement from the 'student_marks1' table. The query is: `SELECT * FROM student_marks1`. The results are displayed in a table with columns: roll_no, name, subject, marks. The table contains 9 rows of data. The bottom panel shows the 'Output' tab with a list of actions and their messages. The actions include a SELECT statement, an INSERT statement, and a CREATE TABLE statement. The messages indicate the number of rows returned and any errors or warnings.
